Agenda:

- 17:00-17:05 Welcome to SABPA COVID19 special webinar (Hua Gong, Host, SABPA)
- 17:05-17:35 A Comparison of The Detection Methods of SARS-CoV-2 (Hongjun Yang)
- 17:35-18:05 Diagnostic Development and Clinical Laboratory Testing of COVID-19 from both China and US (Young Wang)
- 18:05-18:35 Emergency Use Authorization of COVID-19 Diagnostics (You Li)
- 18:35-19:00 Q&A (Moderators: Feng Yang and Pengyu Yang, SABPA)

Featured Speakers:

Hongjun Yang, Ph.D.
Co-chairman of the Precision
Medicine Committee under the
Chinese Society of Biotechnology

Young Wang, M.D.
President-Elect, North
American Chinese Clinical
Chemists Association

You Li, Ph.D.
Head of regulatory affairs
Thrive Earlier Detection Corp

Event Organizers:

SABPA COVID-19 Online Event Task Force:

Andrew Wang, Guang Chen (lead organizer), Feng Yang, Hua Gong, Peter Huang, Rong Xu, Sean Zeng, Weixuan Chen, Xiangming Fan, Yan-bo Yang

SABPA Webinar Task Force:

Andrew Wang (lead organizer), Guang Chen, Feng Yang, Pengyu Yang, Peter Huang, Peter Zhu, Rong Xu, Shuangwei Li, Xuefeng Zhu

Sino-American Biotechnology and Pharmaceutical Professional Association (SABPA)

SABPA is a 501(c)(3) nonprofit organization founded in early 2002 by professionals and scholars from the Chinese community in San Diego. In 2005, the organization expanded to Orange County and Los Angeles. SABPA has more than 3500 members who are scholars, professionals and entrepreneurs in the biotech and pharmaceutical industry in Southern California. SABPA is a grassroots organization managed and operated by volunteers throughout the entire organizational construct. In this volunteer-based organization, team cohesion and collaboration play vital roles that have enabled SABPA to grow, excel and succeed with its unique identity. With this identity SABPA has created a strong foundation and established a common ground to fulfill its missions and is continuously building up the collective power and synergy among its members and collaborators.

Diagnosis of COVID-19 Patients

5:00 - 7:00 PM (Pacific Daylight Time), April 18 (Saturday), 2020 | Online through Zoom

Featured Speakers:

Hongjun Yang, Ph.D.

Co-chairman of the Precision Medicine Committee under the Chinese Society of Biotechnology

Dr. Hongjun Yang is an internationally renowned leader in scientific research and technology management in the field of biotechnology and pharmaceuticals. He has a multi-disciplinary knowledge background. He has nearly 30 years of management experience in cross-border research and development, clinical, compliance, operations, and business in both China and the United States. Dr. Yang is one of the founders and the co-chairman of the Precision Medicine Committee under the Chinese Society of Biotechnology. He has devoted in bridging between China and the United States in biopharmaceutical industries and has made outstanding contributions to the fields of innovation and entrepreneurship, business development, exchanges and cooperation, and personnel training. Dr. Yang is a top multi-disciplinary, knowledgeable and experienced scientist who emphasizes results, products, and compliance.

Young Wang, M.D.

President-Elect, North American Chinese Clinical Chemists Association (NACCCA)
President, MedBio Reference Laboratories and Capital Alliance of CLIA Labs
Clinical Laboratory Lead, MacroGenics, Inc.
Owner, Lab Accreditation LinkedIn discussion group
Board Member of Industry Division,
American Association for Clinical Chemistry (AACC)

Dr. Wang's career started as a faculty member in clinical chemistry division of pathology department at Johns Hopkins School of Medicine. Then he moved to industry as R&D manager, clinical laboratory director working in a CAP accredited laboratory. Dr. Wang is familiar with GCP/GLP regulation, CAP/CLIA/ISO guideline which bridges his academic background and industry experience into next level. Dr. Wang has been working in the field of clinical laboratory testing, assay development and quality management system over 20 years.

You Li, Ph.D

Head of Regulatory Affairs
Thrive Earlier Detection Corp

Dr. You Li is currently head of regulatory affairs for Thrive Earlier Detection Corp. Dr. Li is a human geneticist with extensive experiences in genomic assay development. He has published nearly 20 publications in top scientific journals such as Nature and Nature Genetics. Before joining Thrive, Dr. Li worked at the FDA as a senior lead reviewer in Center for Devices and Radiological Health. He is an expert on FDA regulation of NGS-based assays, especially oncology diagnostic devices.

Dr. Li received bachelor's degrees in Biology and Computer Science from Zhejiang University and Ph.D. degree in Human Genetics from University of Pittsburgh. He received postdoctoral trainings at the University of Pittsburgh, School of Medicine.
